

Augusoft Creates Credit Card Payment Gateway to West Virginia State Treasurer's Office

Credit Card Gateway to WVSTO Available for all Non-credit Programs in West Virginia Using Augusoft Lumens®

Minneapolis – January 19, 2011 – Augusoft announced the release of a credit card payment gateway to connect Augusoft Lumens® to the West Virginia State Treasury Office (WVSTO) for West Virginia University Extended Learning and Pierpont Community & Technical College. This gateway fulfills a requirement by the State of West Virginia for all universities and colleges to provide an electronic payment system for students to use when self-registering for courses online.

Augusoft worked directly with the WVSTO to establish the credit card gateway in Lumens. This feature is now available for all non-credit programs in West Virginia using Lumens. West Virginia University Extended Learning and Pierpont Community & Technical College are the first two schools in West Virginia to go live with this feature.

"I can't tell you how thrilled I was when I registered my first student and saw that the WVSTO gateway page populated automatically from the student profile," said Ron Weist, Director of Community Education at Pierpont Community & Technical College. "All we need to enter is the credit card number of the student in Lumens and the gateway to the WVSTO takes care of the rest."

"We appreciate all the work Augusoft did in working with the WVSTO to establish this credit card gateway," said Sherry Kuehn, Continuing & Professional Education Coordinator at WVU Extended Learning. "It was a lot of hard work but well worth everyone's time and effort to be able to provide this connection that will make it much easier for our students to self-register online and meet the requirements of the WVSTO."

"Establishing the credit card gateway to the WVSTO for West Virginia University Extended Learning and Pierpont Community & Technical College further demonstrates our ability to customize Lumens to meet the unique needs and requirements of our customers," said Paul VanderWaal, Director of Information Technology at Augusoft. "This feature is now available for any other schools in West Virginia desiring to use Lumens to manage their non-credit program and increase online student self-registration."

About Augusoft

Augusoft®, Inc., the leader in non-credit education Software as a Service (SaaS), develops and maintains Lumens® - the first entirely web-hosted Lifelong Learning Management System™. Augusoft Lumens is designed for the unique needs of continuing, community, corporate education and workforce development programs in the US and Canada. Complementing traditional academic systems, Lumens increases online registrations, streamlines business processes, and provides easy data analysis for proven ROI. With Augusoft the security, hosting and compliance responsibilities that are integral to online commerce are outsourced. Today, more than 2.2 million students register for classes using Lumens. Augusoft processes more than \$456 million in transactions for its customers. Visit augusoft.net to see Lumens in action.
