

## Augusoft Lumens® Standard (STND)

# Augusoft®

Provider of Lumens®, the first cloud-based enrollment management software designed for continuing education.

*Lumens is the best investment we have made. Our students and instructors love the 24/7 service. For our small administrative team, it is all about the added support.*

Augusoft's® spectrum of products and services share a proven cloud-based technology foundation – both technical and operational in scope – to run an effective e-business in a competitive environment. With Augusoft Lumens®, lifelong learning programs outsource the security, hosting and compliance issues that are integral to online commerce. Benefit from scalable core applications, flexible best-practice features, and greater user satisfaction.

### Start taking secure online registrations now!

Continuing and community education programs need a powerful, intuitive online registration system. Lumens Standard (STND) an entry-level product to Lumens Professional (PRO), includes all the basic features necessary to give a program a web presence and boost online registrations.

Staff benefits from online registration features in Lumens that handles multiple payment methods in a secure credit card environment with the option

to offer different refund policies or promotional discounts and easily accommodates transfer or cancellation requests. Courses are built into the system and displayed on the site. Classes may be cloned, assigned multiple instructors, capture grades or class performance.

Students self-register and manage their registrations and outcomes through a student portal where they have access to current registrations, transaction history and transcript information. Instructors may manage their own profiles and review their instructional biographies. If granted by the program, the instructor can also have ability to print their own sign in sheets, view class rosters, email students or view earnings and payments or their contracts.

## Continuous Enhancements and Product Development

Customers enjoy seamless enhancements administered directly to their site, with no interruption to service. Market research Product Advisory Boards and customer best practices are used in developing new features and improvements.

### Key Benefits

- **2000+ built-in online classes** will help boost your registrations out of the box.
- **Dashboards that provide live data** for analysis and quick decision making.
- **Over 100 standard reports**, nearly all of which are customizable.
- **Web Hosted** - Augusoft's customer support team provides all your implementation and training needs along with unlimited on-going support. The hosting, maintenance, and PCI compliant gateway (for preferred payment gateway) for your website is included.

- **Continuous innovation** delivered through ongoing upgrades and training.
- **Make data driven decisions** with robust reporting and dashboard – Track and access the right data to make decisions that impact your bottom line. View high-level program info on your dashboard for quick decision-making.
- **Proven Return on Investment (ROI)** - Immediately increase registrations and productivity.
