

Augusoft Lumens® Certificate Management

Augusoft®

Provider of Lumens®, the first cloud-based enrollment management software designed for continuing education.

The ability to offer certificate programs to train knowledge workers will be essential for continuing education programs to grow revenue and thrive. Lumens is the only software we have seen at LERN that includes a feature to manage certificate programs.

The Lumens® Certificate Management* is designed to give programs tools to develop, implement, and manage a wide variety of certificate programs. Based on industry research and best practices, this add-on module provides programs with the flexibility to group and assign multiple courses to a certificate program, set minimum grades and attendance levels for completion, and report on student progress, outcomes and completion status. Customers may upgrade from Essential to Premium at any time. * Requires Lumens PRO or iPRO

\$7,900
Annually

Essentials

Includes following features:

- **Customized Course Functionality -** Creating options for any type of certificate path is easy in Lumens. Staff can customize passing grade and attendance levels, set what classes are mandatory/elective and if classes are to be taken in an order.
- **Flexible Pricing -** Staff can use existing open enrollment classes as part of a certificate. The price for a class as part of a certificate can be different than if the same class is offered in open enrollment.
- **Track and Upsell Students -** Stay ahead of students' needs and alert them by email campaign when the advanced level of a certificate they are pursuing becomes available. This helps you make sure your students come back for the next stage of their education.

All Lumens versions include:

- Unlimited live customer support
- Implementation & training
- Unlimited transactions
- Unlimited users
- Ongoing upgrades and training
- Credit card gateway
- 2000+ built-in online classes

\$14,900
Annually

Premium

Includes following *additional* features:

- **Program Sections -** For advanced management of certificates, students can register and complete the program as a cohort when staff assign specific classes to program sections.
- **Funding Sources -** Track multiple payment sources. Funding sources such as financial aid, student grants or loans are easily tracked and applied as a payment source.
- **Payment Periods -** Let Lumens keep track of when and how the payments should be distributed for a student's balance. Set up payment plans due at predetermined intervals throughout the program.
